## MURATEC

### Muratec F-520

The F-520 is a 14ppm fax machine with strong standard multifunctionality. It offers a second 33,600bps modem, and it has lots of optional memory. The \$2,199 price tag for such a high-end model is pretty good. There's also a duplex version, the F-520D that has a list price of \$2,299. High-yield toner and drum mean less maintenance. Another nice feature is the auto-archiving of outbound faxes and emails. **For:** Main 33,600bps modem with JBIG; second 33,600bps modem as an option; Internet-based administration; standard printing; scanning; internet fax; and PC fax, 80-sheet document feeder; total 1,050 page paper input, standard Ethernet; total 3,370 page memory; touchscreen operation; keyboard. **Against:** 14ppm printing is slow at this level. **Sum-up:** We recommend this machine for offices that need a powerful fax with excellent multifunctionality. We pick this model as an Editor's Choice.

### Muratec F-560

The F-560 is a 20ppm fax machine with strong

standard multifunctionality. It is very similar to the F-520 (above) but with significantly faster printing speed. It offers a second 33,600bps modem, and it has lots of optional memory. The \$2,799 price tag for such a high-end model is pretty good. High-yield toner and drum mean less maintenance. Another nice feature is the auto-archiving of outbound faxes and emails. **For:** Main 33,600 modem with JBIG; second 33,600bps modem as an option; Internet-based administration; standard printing; color scanning; internet fax; and PC fax; duplex standard 80-sheet document feeder; total 1,050-page paper input; touchscreen operation; keyboard total 3,370-page memory; LDAP scan addressing. **Against:** This is not a bargain model, though it offers lots of features for the price. **Sum-up:** A strong buy if you need a powerful fax with excellent multifunctionality and a lot of useful features. This speedy model deserves our Editor's Choice Award.
